

FACT SHEET

GLEDITSIA TRIACANTHOS 'HONEY LOCUST'

Origin: Garden Origin, USA.

Habit: Small, narrow domed deciduous tree with a dense shrubby habit. Slow growing, it can attain dimensions of 4-5m high x 2-3m wide. Broadly pyramidal.

Description: Bright green, elegant leaves up to 16 cm long turning yellow in Autumn.

Tolerances: Adapts to a wide range of conditions and soils but prefers rich moist soils. High pollution and drought tolerance. Not susceptible to any serious pest or disease attacks.

Notes: Good for planting under powerlines in small site. Requires pruning to achieve a single trunk. Attractive large shrub to small tree. A very interesting small, compact form of Gleditsia that will provide year round interest. Excellent for use as a specimen or screening tree in gardens, courtyards, carparks and streets.
